

# ICSerbia Monthly Digest - July 2025

## Establishing ICSerbia

ICSerbia has officially launched as a professional initiative to strengthen the IC design ecosystem in Serbia. Our mission is to build a global network of Serbian IC designers, promote collaboration between students, professionals, and academia, and increase access to resources for analog and digital chip design. We aim to support education and innovation in IC design through open-source tools, affordable tapeouts, and community coordination. Whether based in Serbia or abroad, all individuals and organizations who share this vision are welcome to engage and contribute.

## Resources Coming Soon

The Resources section of the ICSerbia website will soon host a curated collection of guides, tutorials, and documentation to support IC design at various levels. This will include introductory materials for open-source tools like xschem and ngspice, layout workflows using Magic and KLayout, open-source PDK documentation, and links to tapeout platforms such as ChipIgnite and TinyTapeout. All materials will prioritize accessibility and practical application, with a focus on design applications.

If you have useful guides, scripts, or workflows you'd like to share with the community, we invite you to contribute directly through the Get Involved page.

## Community WhatsApp Group

A WhatsApp community has been created to make discussion and coordination easier among members. Digest announcements, event links, and resource updates will be posted there regularly. Whether you're interested in sharing technical insights, asking questions, or just following along with the initiative, we invite you to join the chat and connect with others in the ICSerbia network.

The invite link is available on the Get Involved page and will be circulated again when the resource hub is launched.

## Call to Action

If you are interested in IC design, wish to support the initiative, have feedback or ideas to share, or would like to join the organization in any capacity, we encourage you to get in touch. ICSerbia is open to students,
